I have become more competent in this area because of this instructor.	2 25%	3 38%	2 25%	0 0%	1 13%	0 0%	0 0%	0 0%	0 0%	0 0%	8.6	1.2	9	8

Please add any other comments here.

Course had a very fast pace.

I learned a lot in this class. Some of the material was way more engineering-detail oriented than others, but on the whole it was a really interesting class. The class lacked a little focus at times, maybe two-three times during the quarter, but it usually came back to the overall idea of bitcurrency.

Please comment on the instructor's presentation of course material (style, organization, technique, etc.)?

Presented well

Sometimes explains topics a too quickly.

covers all material in a concrete and concise manner, could give better examples

Lecture style is good. It's his first time teaching at it showed at the beginning, but he became comfortable by the end. Learning how to write on the chalkboard while talking, even just a little bit, can go a long way into maintaining the flow of the lecture.

What did you like best about this instructor?

Open to discussion

Easy to approach to ask questions about the material.

covers all material he sets out to cover

He was always friendly and humble. He knew his stuff, and he always tried to be responsive to feedback and questions.

Please comment on the examinations, homework, and projects. Were they challenging? Fair? Representative?

Fair

Programming homework helped facilitate the learning of certain topics. Project seemed to be quite a bit of work for a 2 units class.

asked for technical names that were easily forgotten

Fair.

How did you feel about the Instructional Resources used (textbook, handouts, labs, etc.)?

Somewhat lacking

NA

Very good videos

N/A

Was your previous course work adequate preparation for this course? (If no, please elaborate)

No, new concept

Yes

the concepts needed for this course were more than the prereqs had

Yes.
